

HONEYWELL PHARMACEUTICAL MANUFACTURING

Pharmaceutical manufacturers are fast tracking innovation into their processes for boosted productivity to stay on the competitive edge.

VISIBILITY WITH DIGITAZED CONNECTIVITY

The pharmaceutical industry is up against a complex landscape, such as supply chain disruptions, gaps in global medicine access, and expectations for increased speed to market. To meet these challenges, pharmaceutical manufacturers can integrate automation and advanced analytics to help drive progress and maximize operational efficiency and agility.

Paper-based operations alone may not suffice to meet increasing operational data storage requirements. Human error can present added risk in quality and security controls. By automating document validation processes, manufacturers can help improve compliance, adhere to regulatory requirements, ensure traceability, and build customer trust.

Through predictive analytics and using data-driven insights, manufacturers could have the ability to act quickly and mitigate risks posed by increased competitors, labor challenges, higher costs, quality standards, and emerging regulations.

By making meaningful and strategic investments in cutting edge manufacturing automation, you can position your business to improve performance and streamline operations,

Honeywell offers an extensive product portfolio of software, handheld and fixed mount barcode scanners, vehicle mounted, handheld and tablet mobile computers, desktop and industrial printers, and voice automation.

Discover our line of productivity solutions for your pharmaceutical manufacturing needs.

DID YOU KNOW?

53% of finance chiefs plan to use data analytics, automation, and cold solutions to help standardize and automate processes[1]

Connectivity, advanced analytics, and automation may revolutionize pharma manufacturing within the next

5 to 10 years[2]

Manufacturers who fully digitized production saw a

90%–100% decrease

in data input errors[3]

BRADY

PRODUCTIVITY SOLUTIONS

Xenon Ultra Handheld Scanner

The Xenon Ultra allows workers to stay productive and agile. With optional dual-camera extended range (XR) models, workers can use the scanner for both up-close and extended scanning. Available in corded configuration.

Granit XP 199iXLR Industrial Scanner

Granit XP XLR model is suited to normal, near-field scanning operations on 1D and 2D barcodes, plus maximum range scanning of UPC up to 80 feet. Ultra-rugged, indoor and outdoor aiming visibility, and Bluetooth connectivity.

HF800-811 Fixed Mount Scanner

Powerful 2D industrial scanner with DPM capabilities in a compact form factor. Build a complete manufacturing management solution for end users for maximum uptime and productivity.

8675i Wearable Scanner

The 8675i offers always at-hand wearable scanning to improve workflow productivity. Premium scanning performance including FlexRange option enables wearable efficiency. Small, lightweight and ergonomic, the 8675i will help your workers perform.

CT45/CT45XP Mobile Computer

CT45 mobile computers, built on the Mobility Edge platform, are rugged, all-purpose productivity tools built for ultra-reliable performance, data connectivity and communications for front-line mobile workers in retail, logistics and fieldwork.

CK65 Mobile Computer

The CK65 mobile computer helps boost productivity by accelerating and error-proofing work with up to 28-hour battery life. Large touchscreen display, and durable construction allow enhanced performance in harsh environments.

CT47 Mobile Computer

CT47 mobile computer with 5G connectivity is a durable and purpose built productivity device providing reliable performance. Built on the Mobility Edge platform for enhanced security and one-hand operation for easy use.

PRODUCTIVITY SOLUTIONS

RT10 Mobile Tablet

A rugged tablet designed for rapid user adoption and optimized device management. Powerful barcode scanning capabilities, rugged construction, and connected worker capabilities.

VM1A Vehicle-Mounted Computer

Compact, ergonomic and powerful, the Thor VM1A is designed to help maximize productivity, minimize visual obstructions and reduce downtime. The Smart Dock feature helps reduces maintenance costs and allows users to quickly shift computers. Additional features include indoor/Outdoor use, 8-inch display, and field-replaceable front panel, for continuous use.

PX940 Industrial Printer

The PX940 high-performance industrial printer with integrated label verification technology provides reduced error printing. Rugged, all-metal housing, predictive maintenance, and Bluetooth capabilities.

PM45/PM65 Industrial Printer

This series of printers is designed for high quality label printing and offers high-precision and high-volume printing. Reliable performance helps enterprises enhance automation and intelligence in manufacturing and supply chain management for high operating efficiency.

PC45 Desktop Printer

Powerful performance, reliable connectivity, and easy integration to help tackle rapidly changing everyday work environments. Enterprise-level ruggedness and a large touch screen display, the PC45 series desktop printers bring reliability in a compact design.

Voice Automated Solutions

Optimize your operations with our flexible and robust voice technology, while maximizing existing IT investments. Honeywell Voice headsets offer significant reliability and ease-of-use features to get the most out of your operations. Honeywell wireless headsets give workers greater mobility and raise the standard in mobile workforce ergonomics.

Operational Intelligence

Honeywell Operational Intelligence is a software offering that goes beyond simply providing data. It takes it one step further by analyzing that data and converting it to actionable insights - even those you didn't know were there. In addition to providing data-driven insights, Honeywell Operational Intelligence enables automation that helps manage workflows and disruptions in real-time.
